warmshell/BREATHE

FABRIC	100% Polyester
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	240 g

FEATURES

Half-zip second layer, multi-activity, and minimalist, made with WARMSHELL BREATHE technology, offering exceptional moisture absorption and quick drying while providing comfort and warmth. The fabric is 100% RECYCLED and monomaterial, making it a circular garment, thus facilitating its recycling at the end of its useful life. Perfect for year-round use. Both the fabric and the athletic pattern provide excellent freedom of movement.

- Flat seams.
- Reflective prints to improve visibility.
- Chin guard to prevent zipper chafing.
- Cuffs finished with elastic trim for a perfect fit.
- Thumbhole for inserting the thumb.
- Good resistance to pilling.
- Recycled polyester from post-consumer plastic bottles.
- Fabric with BLUESIGN® certification.

HELIUM LITE JKT M 1644275

PURE WHITE/AUTUMN GLORY-1287

Bluesign® approved fabric

microshell

FABRIC	100% Polyester
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	180 g

FEATURES

Very lightweight technical jacket, windproof, highly breathable, and water-resistant. It is entirely made with recycled and monomaterial fabrics, facilitating recycling at the end of its life, making it an ecodesigned garment to be circular. The MICROSHELL technology of the outer ripstop fabric made of 20D makes this garment innovative and high-performing. Its very low weight and compressed size make it especially suitable for protecting you on the windiest days during both aerobic and more static outdoor activities, or to prevent heat loss once the activity is finished. • Water column of 5,000 mm, to offer great water resistance without being thermosealed. • Excellent breathability of MVP 30,000 g x m² x 24h. • Chest adjustment system to allow ventilation when necessary, without fully opening the jacket, preventing overheating while maintaining protection for the rest of the body. • Hood with a wide range of adaptability thanks to the side elastics. • Elastic bottom and cuff adjustments for better user adaptability and to prevent the entry of exterior air. • 1 chest pocket for optimal storage. • Reflective prints to improve visibility. • Compressible jacket in power mesh bag for easy transport. • Outer fabric in 100% recycled Polyester from plastic bottles. • Water repellent treatment (DWR) free of PFCs.

HELIUM JKT M 1644273

DARK STONE-7566

PURE WHITE/AUTUMN GLORY-1287

FABRIC	100% Polyester
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	320 g

FEATURES

Multifunctional technical jacket, semi-warm, windproof, and water-resistant. It is lightweight, compactable, and entirely made with recycled and monomaterial fabrics, facilitating recycling at the end of its life. The outer ripstop MICROSHELL made of 20D provides total wind protection, water resistance, and excellent breathability, while thermal insulation and moisture control are provided by the very lightweight inner lining in WARMSHELL BREATHE. The combination of these two fabrics offers an innovative and high-performance garment, especially suitable for cool and windy days during your most aerobic outdoor activities. • Water column of 5,000 mm, to offer great water resistance without being thermosealed. • Excellent breathability of MVP 30,000 g x m² x 24h. • Chest adjustment system to allow ventilation when necessary, without fully opening the jacket. • 1 chest pocket for optimal storage. • Hood with a wide range of adaptability thanks to the side elastics. • Elastic bottom and cuff adjustments for better user adaptability and to prevent the entry of exterior air. • Reflective prints to improve visibility. • Interior lining with POLYGIENE® anti-bacterial treatment. Prevents odors. • Compressible jacket in power mesh bag for easy transport. • Outer fabric in 100% recycled Polyester from plastic bottles. • Inner insulation fabric in post-consumer recycled Polyester. • Water repellent treatment (DWR) free of PFCs.

EHUNMILAK 2.0 JKT M 1644392

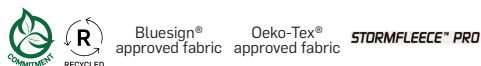

New Colors

BLACK-9937

MID FOREST-0533

FABRIC	89% Polyester, 11% Elastane
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	450 g

FEATURES

The new EHUN MILAK 2.0 JKT is a jacket created by TERNUA's internal development team, after gathering all the feedback and suggestions from a large number of participants in the legendary EHUN MILAK mountain race.

It is a highly technical garment, yet very versatile, as it is made with the innovative STORM FLEECE PRO® fabric, which offers benefits similar to those of a laminated softshell. It provides excellent wind protection and water resistance without a membrane, while also delivering great breathability during various activities, whether aerobic or static. All of this comes with exceptional freedom of movement and comfort, thanks to its 4-way stretch fabric.

It includes a multitude of technical details to meet many of the user's needs during activity:

- Two large zippered hand pockets with dual functionality: • Storage or extra ventilation if needed. • Adjustable hood and hem with ultralight drawcords. • Elastic panel on the front, under the visor, securing the hood and reducing its movement during activity. • Very elastic and comfortable Lycra cuffs, with a thumb hole for an extra snug fit. • Chest adjustment system to allow ventilation when needed, without fully opening the jacket. • Side zippered pocket for carrying a phone or other items. • Double interior pocket with large storage capacity. • Very durable fabric with high abrasion resistance. • Highly breathable. • Wind Resistant (CFM<25, ASTM D737). • Passes the Rain Test (AATCC 35). • PFC-free DWR (Durable Water Repellent) treatment. • BLUESIGN® certified fabric. • Polyester made from post-consumer recycled plastic bottles.

THUNDER JKT M 1643894

ACID LIME-6933

FABRIC	90% Polyester, 10% Elastane
FIT	Regular
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	395 g

FEATURES

Very versatile and lightweight jacket with hood made of Stormfleece Pro fabric.

- High wind resistance.
- Fabric from the recycling of post-consumer plastic bottles. Highly water resistant. Passes Rain Test (AATCC 35). Very breathable. Air permeability is 10.4 (ASTM D737).
- PFC-free DWR. Very compressible. Articulated pattern for greater freedom of movement. Hood finished with elastic trim. Cuffs finished with elastic trim and with thumb hole.
- Two pockets with zips for the hands.
- Adjustable hems with elastic drawstring. Flat seams.
- Reflective details.
- Bluesign approved fabric.

CYCLONE PRO JKT M 1644271

New Colors

VERMILLION ORANGE-0530

DARK STONE-7566

MID FOREST-0533

FABRIC	100% Polyamide
FIT	Slim
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	200 g

FEATURES

Very lightweight technical jacket made with our SHELLTEC ACTIVE FLEX technology, waterproof, breathable, resistant, and highly compressible. Its pre-formed pattern and bi-elastic fabric offer good freedom of movement and comfort during use. The CYCLONE PRO is your ideal companion for all kinds of outdoor activities, mainly aerobic, where the protection/lightness ratio is key. • Eco-designed jacket to be circular, using recycled, monomaterial fabric, and at the end of its life, it is recyclable. • Thermosealed seams and water-resistant zippers. • Water column of 20,000 mm. • Breathability of MVP 20,000 g x m² x 24h. • Water-resistant front zippers. • Hood with a wide range of adaptability thanks to the side elastics. • Elastic panel for hood support and wind protection on the forehead under the visor. • Chest adjustment system to allow ventilation when necessary, without fully opening the jacket. • Adjustable hem with ultralight toggle. • Elastic cuffs. • Reflective prints to improve visibility. • PFC-free water repellent treatment. • Fabrics with BLUESIGN® certification. • Fabric: 20D Nylon Stretch, 60 gr/m² recycled (post-industrial). • Integrated compression bag in the jacket for transport/storage

HELIUM LITE JKT W 1644276

PURE WHITE/RASBERRY-1289

microshell

FABRIC	100% Polyester
FIT	Regular
SIZES	EU XS-XXL US/CA XXS-XL
WEIGHT	160 g

FEATURES

Very lightweight technical jacket, windproof, highly breathable, and water-resistant. It is entirely made with recycled and monomaterial fabrics, facilitating recycling at the end of its life, making it an ecodesigned garment to be circular. The MICROSHELL technology of the outer ripstop fabric made of 20D makes this garment innovative and high-performing. Its very low weight and compressed size make it especially suitable for protecting you on the windiest days during both aerobic and more static outdoor activities, or to prevent heat loss once the activity is finished.

- Water column of 5,000 mm, to offer great water resistance without being thermosealed.
- Excellent breathability of MVP 30,000 g x m² x 24h.
- Chest adjustment system to allow ventilation when necessary, without fully opening the jacket, preventing overheating while maintaining protection for the rest of the body.
- Hood with a wide range of adaptability thanks to the side elastics.
- Elastic bottom and cuff adjustments for better user adaptability and to prevent the entry of exterior air.
- 1 chest pocket for optimal storage.
- Reflective prints to improve visibility.
- Compressible jacket in power mesh bag for easy transport.
- Outer fabric in 100% recycled Polyester from plastic bottles.
- Water repellent treatment (DWR) free of PFCs.
- Fabric with OEKO-TEX(R) and BLUESIGN(R) certification.

MID FOREST-0533

STORMFLEECE™ PRO

FABRIC	89% Polyester, 11% Elastane
FIT	Slim
SIZES	EU S-3XL US/CA XS-XXL
WEIGHT	400 g

FEATURES

The new EHUN MILAK 2.0 JKT is a jacket created by TERNUA's internal development team, after gathering all the feedback and suggestions from a large number of participants in the legendary EHUN MILAK mountain race.

It is a highly technical garment, yet very versatile, as it is made with the innovative STORM FLEECE PRO® fabric, which offers benefits similar to those of a laminated softshell. It provides excellent wind protection and water resistance without a membrane, while also delivering great breathability during various activities, whether aerobic or static. All of this comes with exceptional freedom of movement and comfort, thanks to its 4-way stretch fabric.

It includes a multitude of technical details to meet many of the user's needs during activity:

- Two large zippered hand pockets with dual functionality: • Storage or extra ventilation if needed.
- Adjustable hood and hem with ultralight drawcords.
- Elastic panel on the front, under the visor, securing the hood and reducing its movement during activity.
- Very elastic and comfortable Lycra cuffs, with a thumb hole for an extra snug fit.
- Chest adjustment system to allow ventilation when needed, without fully opening the jacket.
- Side zippered pocket for carrying a phone or other items.
- Double interior pocket with large storage capacity.
- Very durable fabric with high abrasion resistance.
- Highly breathable.
- Wind Resistant (CFM<25, ASTM D737).
- Passes the Rain Test (AATCC 35).
- PFC-free DWR (Durable Water Repellent) treatment.
- BLUESIGN® certified fabric.
- Polyester made from post-consumer recycled plastic bottles.

FABRIC 100% Polyester

FIT Regular

SIZES EU XS-XXL | US/CA XXS-XL

WEIGHT 195 g

FEATURES

Very lightweight, packable, windproof, and water-resistant technical jacket. It is made entirely of recycled fabrics and monomaterials, facilitating its recycling at the end of its life. The 20D ripstop MICROSHELL outer shell provides total protection against wind, water resistance, and great breathability. This garment is especially suitable for cool, windy days and even light rain. An essential companion for a variety of outdoor activities, whether worn or compressed and ready to be used when needed.

- 5,000 mm water column to offer great water resistance without being heat-sealed.
- Excellent breathability of MVP 30,000 g x m² x 24h.
- Hood with a wide range of adaptability thanks to the side elastics.
- Chest adjustment system to allow ventilation when necessary without fully opening the jacket.
- 1 chest pocket for optimal storage.
- Adjustable hem and cuffs with elastics to prevent the entry of external air.
- Compressible jacket in its carrying bag.
- Outer fabric in 100% recycled Polyester from plastic bottles.
- Water repellent treatment (DWR) free of PFCs.
- Fabric with OEKO-TEX® and BLUESIGN® certification

New

MELON-2832

WHALES GREY-5775

SAILOR BLUE-0479

FABRIC	100% Polyester
FIT	Regular
SIZES	EU XS-XXL US/CA XXS-XL

FEATURES

Short-sleeved, relaxed fit, lightweight, elastic, and breathable T-shirt with a small graphic on the chest.

It incorporates Dryshell technology and contains S.Café® anti-odour treatment from recycled coffee grounds. Through this treatment, we reduce the need to wash the garment, extending its useful life.

The T-shirt is made of 100% post-consumer recycled polyester. Both its recycled origin and the anti-odour treatment mean that we reduce the environmental impact of the garment.

The T-shirt's casual look, combined with its technical characteristics, make it an ideal garment for everyday use and outdoor activities.

- Fabric 100% recycled.
- Made in Vietnam.
- Made in a Fair Trade and BCORP certified factory.
